About Us

Emppyrean Renewables & Power Pvt. Ltd. is an all-verticals renewable energy EPC company established in 2017. It is classified as a non-government company registered at the Registrar of Companies, Mumbai. From technological selection procurement, integration and maintenance, We are leading the way with engineered solutions that are both proven and practical as the world turns to alternatives in the face of high oil prices, depleting coal reserves, growing concerns over energy security, and the threat of climate change.

We have made our mark in residential, commercial, governmental, and industrial establishments. We are present in more than 8 states and 2 union territories in India.

We are about to set our footprints overseas with our first international project in the Maldives. We have a stronghold in central, western, and southern India, with more than 7.5 MW of renewable projects successfully executed & about 12 MW work in progress.

Our Projects

Asta Laxmi Spinning Mill 490 KW / Rooftop

Adilabad / Telanagana

Manufacturing / Cotton Yarn

Shivam Paper Mill

500 KW / Ground mounted

Raipur / Chhasttisgarh

Manufacturing / Corrugated box paper

Videocon Solar Power Plant

5 Mw / Ground mounted

Warora / Maharashtra

Manufacturing / Producing Power

Why Renewables

Producing energy from the conventional energy resources takes a severe toll on our environment, polluting our air, land, and water. Having a consistent electricity supply for hassle-free living, smooth business operations, and minimum maintenance makes renewable resources the most viable solution for energy generation.

Renewables provide freedom from soaring bills and increased power cuts without impacting the environmental conditions.

Getting and trading carbon credits will become a very lucrative source of income shortly. With our highly skilled workforce and a strong commitment to quality, we strive to provide superior energy solutions to our customers.
